

Stat-A-Dyne™ Elbow

Core Technologies

- Three modalities for tissue elongation (*static progressive, dynamic, or dual function*)
- Bi-directional hinge for flexion and extension
- Circular hinge for terminal range of motion
- Light-weight and rigid aircraft aluminum maintains anatomical alignment

Feature Benefit

- Elbow ROM from -45° hyperextension to 150° flexion
- Counterforce bracket provides 3-point lever arm
- Off the shelf and custom cuffs for maximum soft tissue capture
- Proximal cuff opens for terminal elbow flexion
- Forearm cuff crosses wrist joint to prevent point loading
- Adjustable L-bracket maximizes patient comfort
- Adjustable carrying angle

Indications

- Fracture & Dislocation
- ORIF
- Crush Injury
- Radial Head Fracture
- Joint Arthroplasty
- Tendon & Ligament Repair
- Burn
- Closed Manipulation
- Other Orthopedic and Neurological Conditions
